

CLAIRE MCDONALD

Claire McDonald has recently been appointed CEO of SCOR Business Solutions (SBS) and is now the newest member of SCOR's Executive Committee. She brings a wealth of experience from her previous role on the Board of HDI Global SE, where she was globally responsible for Property, Engineering, and Marine Cargo performance (Underwriting and Claims), as well as for the global Risk Consulting team. Before this, Claire served as Managing Director for HDI in the UK and Ireland, where she led significant milestones, including the UK branch's transition to approved regulatory status post-Brexit, expansion into new product lines, organizational restructuring, and a comprehensive re-underwriting of the property portfolios.

Earlier in her career, Claire spent 32 years with the Allianz Group, in Allianz Global Corporate & Specialty (AGCS). Her journey there spanned a wide range of roles across the UK, France, regional, and global functions within the corporate and multinational insurance sector. She spent her first two decades in underwriting, eventually specialising in onshore oil, gas, and petrochemicals. In 2002, she became the Regional Hub Leader for EMEA and AP, and later, in 2006, took on the role of CUO Energy.

In 2007, Claire transitioned from underwriting to operations, taking on leadership roles across several countries before moving into global roles as Head of Allianz Multinational (IP product) and Global Head of Operations, where she managed insurance, real estate, business continuity, and procurement. She held these dual roles until her departure in 2019 to join HDI.

Beyond her executive responsibilities, Claire is a Liveryman in the Worshipful Company of Insurers and serves as Chair of iWIN, where she actively mentors and supports young women in the industry. As an Ambassador for ISC Group, Claire is committed to creating a more gender-equal world, which is rooted in her core values of fairness, meritocracy, and efficiency; believing that gender should never be a barrier to opportunity.
